

# Close to You

By Michael Tyrrell

## Verse 1

When the goose bumps fade  
          **Bb**                  **F**  
          **C**                  **Dm**  
And the gold dust blows away  
**Bb**                  **F**          **C**  
What will you do with Me?  
          **Bb**                  **F**  
Will you need a fresh word  
          **C**                  **Dm**  
Or a couple of signs  
          **Bb**                  **F**      **C**  
And a wonder thrown in for free?  
          **Bb**      **F**      **C**      **Dm**  
I'm not a mani - fe - sta - tion  
          **C**      **Dm**  
I'm the God of creation  
          **Bb**      **F**                          **C**  
And who I Am is more than what I do  
          **Bb**  
So now, if you don't mind,  
**Gm**          **C**          **Bb**      **F**      **C**      **Dm**      **Bb**      **F**      **C**  
I'd like to get close to you

## Verse 2

While you are naming and claiming,  
          **Bb**                  **F**  
**C**                  **Dm**  
Blabbing and grabbing  
          **Bb**                  **F**          **C**  
Did you stop to even ask My will?  
          **Bb**                  **F**  
You came close to Me  
          **C**                  **Dm**  
When your pockets were empty

**Bb**            **F**            **C**  
 Was that all that you wanted Me to fill?  
**Bb**            **F**            **C**  
 I'm so much more than a credit line  
**Dm**            **C**            **Bb**  
 My friends say I'm more like new wine  
**Bb** **Gm**                    **F**            **C**  
 And I've been pouring since the veil rent in two  
**Bb**  
 But now, if you don't mind,  
**Gm**            **C**            **F**  
 I'd like to get close to you

### Bridge

**Dm**  
 Why did you go?  
**C**                                    **Bb**  
 You left me standing here all alone  
**C**                                    **Bb**  
 As they drove the nails through My feet  
**C**                                    **Bb**  
 I saw you dancing with your lover in the street  
**Dm**                                    **C**  
 Yet, as I drew in my last breath,  
**Bb**  
 Embracing the pain of death  
**Bb**                                    **F**            **C**  
 Love built a bridge that made all things new  
**Bb**  
 So now, if you don't mind  
**Gm**            **C**            **F**  
 I'd like to get close to you

### Chorus

**Dm**            **C**                    **Bb**            **F**  
 Close to you (that's all I ever wanted)  
**Dm**            **C**                    **Bb**                                    **F**  
 Close to you (someone to walk in the cool of the day)

**Dm**    **C**

Close to you

**Am**                      **Bb**

Some things remain unspoken,

**Am**                      **Bb**

Yet my blood is my token

**C**                      **F**

To get close to you
